History

Earlier in the academic year, we studied the Ancient Sumerians. As we discovered, this civilization has become known as the 'birthplace of civilization' as they invented many things that we still use today (the wheel, time, mathematics, writing etc).

Your task is to design an invention for our modern society. What type of invention does our world need-robotic teachers, flying cars, a time machine etc.

Draw your invention and write a brief description about what it does.
