

Maths

Can you explain why the sum of four consecutive numbers is always even?

You will need to test this for yourself first.
Then use your findings as examples in your explanation.

English

Can you think of (and spell) the words with silent letters that are missing from these sentences?

At Scouts, I have been learning how to tie _____ in ropes.

Stuart accidentally hit his _____ with a hammer during the Design and Technology lesson.

Kaasha went on a boat trip to visit a tropical _____ during her summer holiday.

I always put my sweet _____ in the bin.

Think of some more words with silent letters and use them in your own sentences.

Investigation

A fun investigation.....go on a short minibeast hunt (*I bet it's a long time since you last did this!*). Create a graph to show the types of minibeasts that you found.

Which type of graph will you use?

What will you put in the x-axis?

What will you put in the y-axis?

Challenge - Create questions about your graph to test someone else.
