Maths

Place Value

Write four hundred and nineteen thousand, two hundred and ten in numerals.

+ and –

52 800 + 600 =

13 700 – 2900 =

Fractions

What number is hidden in these equivalent fractions?

$$\frac{7}{8} = \frac{}{24}$$

× and ÷

Use a written method to solve this calculation:

4425 × 4 =

Problem Solving

Complete this calculation:

18 × 9 = 200 –

Problem Solving

Write three numbers that are multiples of both 3 and 8.

Fractions

Convert this mixed number into an improper fraction:

$$5\frac{3}{4} =$$

Reasoning

2 is the only even prime number.

Is Harry correct? Explain your reasoning.

English

Wolves

- Often live in wild spaces
- Despised by man due to attacks on farm animals
- Hunted by man
- Not know to attack humans unless suffering from disease
- Taught to fear humans
- Grey wolf – in danger.
- Population reduced dramatically.
- Habitats are often ruined by man.
- Humans using wolf's prey for their own use.

Think about the character of the Big Bad Wolf.
Read the fact box on the left.

When people want to change something or take care of something they organise a **petition.**
A **petition** is a list of the names of people that agree.

For example, you could arrange a petition to save the Brazilian rainforest from being cut down.
Then you need lots of people to sign it so that a councillor or politician will take it seriously.

Your petition: **SAVE THE GREY WOLF!**
Explain why the Grey Wolf should be saved.
You must use your most persuasive language so that your petition gets lots of signatures.
Use the facts to help you.

History

VE Day – Remember the past and build a peaceful future…

Design a poster to remind everyone to be kind to each other.

TOP TIP

Find somewhere to display the poster so as many can see it as possible.

Challenge – Find out and learn the word for 'peace' in as many different languages as you can.
