

### Maths

## Addition Towers

Take the numbers 1, 2, 3, 4, and 5.

Write them in any order and then add each consecutive pair and write the total above. Keep going until you have one number at the top.

*Does the order of the numbers 1, 2, 3, 4 and 5 make a difference to the number you reach at the top?  
 What are the highest and lowest totals possible to reach?  
 Can you explain how the order impacts on the total?*

### English

**Continuing from last week's English activities... This is an email to Jack and his brothers regarding their houses...**

**Challenge** – Design a house where all three pigs could live.

Wolf clearance project ambassador: Red Riding Hood

Dear Jack (and brothers),

It has come to my attention that you are all planning to build houses on the clearing near the magic toadstools. I am writing to persuade you not to do this for the following reasons:-

- 1.The 'Wolf clearance project' has worked extremely hard for the last few years to eradicate the area from these dangerous predators. Your building plans mean that the local wolf has reason to return.
- 2.The plans for two of your houses look very unstable and none of the houses look as though they will blend in with the local area.
- 3.The site you have chosen is an important site for my family as it is the place where my Grandmother's house used to be. We would prefer to keep the area clear in memory of the tragic end to her life.

Please could you email me back to confirm that you have read and understood my reasons. I would be pleased to listen to your point of view.

L.R.R.Hood

Please write back to Little Red Riding Hood. Understand her viewpoint but explain that you need to build your houses there.

### History

## Today is Florence Nightingale's birthday – 12<sup>th</sup> May.

*Florence Nightingale was a trailblazing figure in nursing who greatly affected 19<sup>th</sup> and 20<sup>th</sup> century policies around proper care. Through hard work and persistence, Florence educated the world on what it takes to keep hospitals clean and help sick people recover and stay clean and healthy.*

Watch the following clip to find out more about her:

<https://www.bbc.co.uk/teach/class-clips-video/ks2-florence-nightingale-the-founder-of-modern-nursing/zjbp2sg>

Then using what you have learned from the video and perhaps your own research, you are going to find a creative way to present information about Florence Nightingale's life.

If you are not sure about how you would like to present it, here are some suggestions:

- poster - fact file - diary entries – word search - poem – recorded speech – comic strip - create a quiz.

**Challenge** – What tribute has been made to Florence Nightingale in the UK's response to Covid-19?
