

Emotional Well-Being:

Taking time for yourself to do something that relaxes you is so important. I personally like to read books set in foreign countries to relax me; it makes me feel like I am having an adventure from my sofa! Today, I would like you to spend some time thinking about what makes you feel relaxed and happy. Maybe you like reading, colouring, artwork, listening or playing music or maybe you like chatting with your family. Whatever it is that you like to do, I would like you to spend some time today doing something that relaxes you. You can send me a picture on Class Dojo if you like as well!

English:

Today we are going to sequence the events of the report. If you have a printer and you can print the newspaper off then you could ask a grown up to chop it up, mix the piece around and then you can see if you can put them back together in the right order. If you do not have a printer, please can you write a sentence to summarise each paragraph. For example:

Paragraph 1 = There was a 9.1 earthquake on the San Andreas fault line in San Francisco.

Maths:

Today we are going to be interpreting 1:1 pictograms. A pictogram is where you use a picture to represent a number, for example one. You might draw a pictogram to show what your family's favourite ice creams were. If one person liked chocolate, you would draw a picture next to the chocolate one to show that one person liked it. If another person liked it you would draw another picture.

These videos will help you:

https://www.youtube.com/watch?v=GWoya4T37PU&ab_channel=Math%26LearningVideos4Kids

https://www.youtube.com/watch?v=0coMyuzvG4&ab_channel=YearTwo

Expectations:

- Everyone will complete all the fluency questions, 1 reasoning and 1 problem solving.
- Some people will complete all the reasoning questions as well.
- Few people will complete all the problem-solving questions as well.

Collective Worship:

Can anyone remember yesterday's sure way to fail? How did yesterday teach us to be resilient? Today's sure way to fail is to compare yourself with others. There will always be someone who can do what you can do better. There will always be someone who can read faster, ride faster, swim faster, learn faster, but does that mean that you shouldn't try? We've said today that we shouldn't always compare ourselves with other people, by that we mean we shouldn't be too disappointed if we can't do something as well as someone else can. Imagine our baby at their mums and toddlers group and they start chatting with a baby that is already walking and running around the hall. Imagine to our baby's horror that this other baby is 4 weeks younger.

How could that make our baby feel? Should that stop our baby from practicing to walk? No of course not, but sometimes when we compare ourselves to others it can make us feel like we are too slow or we aren't good enough. We all learn and progress at our own speed. Whilst everyone in the line-up for the start of the 100m Olympic final would like to win, there is only one winner. Should the others give up because they can't be compared with the winner or should they continue to strive to beat their own best time? For many athletes, the person they are usually racing is themselves, trying to beat their own fastest time and hoping that their time is faster than everyone else's. Other people can be an inspiration, but never let someone else's success stop you from trying.

Time to reflect

- Have you ever given something up because someone else is better at it than you?
- Will there always be someone better at it than you?
- How can we ensure that we enjoy it without comparing ourselves to others?

Reflection (Prayer)

(Dear God)

We are thankful for all the gifts in our school and the variety of activities that we are good at. May we not judge or be discouraged by comparing ourselves with others. Let us, instead, be inspired by others and celebrate all our successes. *(Amen)*

PSHCE:

I've been trying to think positively about lockdown and how it is stopping me from physically seeing my friends. I am very lucky that we can: text, skype, zoom or facetime to stay in contact. When we text it is instant, my friend in Ashington can read the text 20 seconds after I sent it. Not so long ago, people did not have phones in their houses, they did not have mobiles or tablets or computers. If they wanted to talk to their friend, they had to write a letter, which they had to post. Sometimes this could take days to get there! We are lucky we can talk to our friends very easily, but maybe writing letters could be nice as well? It would be a nice surprise to find an envelope on your doormat instead of just a pile of junk mail! You don't have to post this letter, but please could you write one to a friend or a family member. You could write more than one if you like. If you do post it, why don't you count how many days it takes to get there? Could you put a small gift in your letter, like a lovely picture you have drawn or painted, or maybe a nice picture?

Enormous Earthquake Strikes!

San Andreas Earthquake

On the 29th of January 2020, an immense earthquake struck on the San Andreas fault line in California, USA. The strike slip fault caused a huge earthquake which was 9.1 on the Richter scale. Our reporter Miss O'Neil was on the scene to interview the locals and find out more about the event.

First of all, it had seemed like any normal evening. California's heat wave had passed, and families were enjoying a cool dinner together when suddenly things changed. At 20:30 on the 29th of January a gigantic earthquake struck!

Terrifyingly, the ground began to shake, and buildings began to sway. After that, car alarms started to beep, and glass windows began to shatter. In total, the shaking lasted for 12 minutes and 30 seconds before it stopped although there were several aftershocks. Luckily, nobody was killed but many people were injured. In San Francisco, some buildings collapsed because the aftershocks were so strong there.

San Andreas fault line, running along California.

Miss O'Neil spoke with local resident, Bob Smith (27) who lives in San Francisco.

"I couldn't believe my eyes" he said, "We dashed under our kitchen table to stay safe and waited for a long time before the shaking stopped."

"Did you have any damage to your house?" Miss O'Neil asked.

"Fortunately, we didn't have any damage, but our neighbours have got some broken windows." Bob Smith replied.

Then, Bob said that the local people started to clean up the mess because they wanted to get back to normal as fast as they could. California has recovered well from this colossal earthquake and hopes that there won't be another one for a long time!

Do you feel prepared for an earthquake?

Maths:

Fluency:
F1)

Colour	
Blue	
Green	
Red	
Purple	

Key

1. What is the most popular colour t-shirt?
2. What is the least popular colour t-shirt?
3. How many more children chose blue t-shirts than red?
4. How many children are in this class shown in the pictogram?

Fluency:
F2)

Minibeast	
Woodhouse	
Ladybird	
Centipede	
Worm	
Spider	

Key

Complete these sentences in your book. Show your working out.

1. There are ___ ladybirds.
2. There are ___ centipedes and worms altogether.
3. There are ___ more worms than centipedes.
4. What else does the pictogram tell us.

Reasoning:

R1)

Here is a pictogram.

The most popular colour sweet is green.

Do you agree with Eva?

Explain why and correct any mistakes.

Problem Solving:

P1)

Teddy writes these statements about his pictogram:

- There were more cows than sheep.
- There were the same number of sheep and horses.
- There were more chickens than any other animal.
- There were less cows than goats.
- There were 8 goats.

Can you draw a pictogram so that Teddy's statements are correct?
What title would you give it?

Problem Solving:

P2)

Miss O'Neil has split tea on her pictogram!

Use her clues to work out how many people like rap.

2 more children like rap than pop music.

● = 2 votes

Reasoning:

R2)

Use the pictogram to decide if the statements are true or false.

Explain your answer.

All fruits are equal to 1.

1. Apples are most popular.
2. Bananas, apples and cherries total 50.
