

*May we give them the roots to grow and the wings to fly*

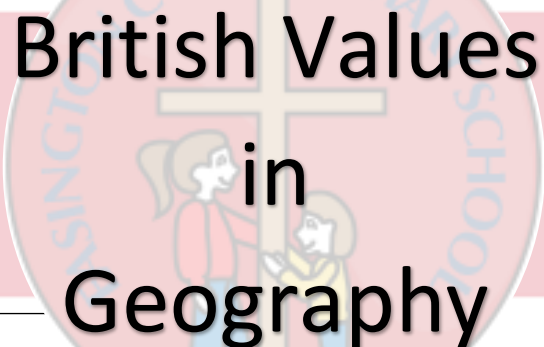

### Individual Liberty

At Easington C of E Primary School, all children are encouraged and supported to become independent learners in which they are supported in sharing their own opinions, ideas and answers to questions. In Geography, all children are encouraged to listen to others but understand that they can explore their own interpretations and findings when investigating and studying the world we live in. Our Geography lessons also encourage children to show initiative, listen and respect the views of their peers and in doing this accept that others' ideas may be the same as their own however they can all contribute positively as individuals.

### Rule of Law

At Easington C of E Primary School, we learn an understand the importance of safety and rules when working as geographers. We do this by ensuring that we follow our safety rules and we allow children to understand the consequences of their actions, which in turn helps students apply this understand to their own lives.

## British Values in Geography

### Democracy

We learn through our Geography lessons into consideration the views and opinions of our peers and the adults in school. We know to take turns and listen to instructions from others.

### Tolerance

At Easington C of E Primary School, our Geography learning underpins the value that other people may have different ideas of beliefs to ones self and that they should be accepted and tolerated without discrimination or prejudice. To do this, we look at many geographical locations which often showcase other cultures and we work hard to appreciate and understand them.

### Mutual Respect

When learning and exploring during Geography lessons, we collaborate and work respectfully with our peers; supporting each other and sharing our ideas and opinions. We discuss our research/findings and respect each other's work often offering support and advice to others.
